A PERFECT FIT.

Metal Design Systems Installer Training

Metal Design Systems is pleased to offer our customers a comprehensive installation training course located at our corporate office in Cedar Rapids, Iowa. This training is highly recommended as it provides in depth classroom coverage of our engineered wall panel systems, as well as hands on experience at our installation training wall. The class also covers a couple different methods to use when taking field dimensions, a tour of our shop, and some great tips for panel modifications in the field. Tommy Simpson, one of our Regional Sales Managers instructs the class. We believe you will find this training to be invaluable, not only when it comes to installing, but also when estimating the labor involved with our different systems. There is no charge for the class and lunch is on us!

Our training dates for 2012 are listed as follows:

January 25
February 29
March 28
April 25
May 30
June 27
July 25
August 29
September 26
October 24
November 28
December 19

All classes begin at 8:30 AM and finish by 4:00 PM.

If you would like to join us, simply send an email to Janice Roman at janice.roman@crmdsi.com indicating the date preferred and the names of those attending from your company. Please register early as classes may fill up quickly. Upon your registration request, a confirmation email of your registered training date along with some nearby hotel information will be sent to you. Our contact information is also listed at the top of this document and more information about us and our systems can be found at www.metaldesignsystems.com.
